

MT-ATP6 — Mitochondrial Marker (Dense Expression Pattern)
Both models achieve similar $PCC_{8\mu m}$ (~ 0.76) | SSIM shows Poisson better preserves structure

A. H&E Histology (WSI Mosaic)

B. Ground Truth (2 μm Visium HD)

C. Model D (MSE Loss)
 $PCC_{2\mu m}=0.54$ | $SSIM_{2\mu m}=0.27$ | $PCC_{8\mu m}=0.76$

D. Model E (Poisson Loss)
 $PCC_{2\mu m}=0.54$ | $SSIM_{2\mu m}=0.30$ | $PCC_{8\mu m}=0.76$

E. ZOOM: H&E

F. ZOOM: Ground Truth

G. ZOOM: MSE Pred

H. ZOOM: Poisson Pred
